

5/13/20-- Uinta County COVID-19 Update

STAY HOME IF SICK, ISOLATE, IF TESTED

--For whatever ails you, be it COVID or not, protect everyone around you by staying home.

If you experience any symptoms of COVID-19, please call a healthcare provider and get tested.

Remember, while awaiting test results, it is important to not only stay home, but also to self-isolate, which means keeping away from people as much as possible, even at home.

Luckily, Wyoming Public Health Lab test results have a faster turnaround, and that wait time won't be too long—a day or two in general.

Testing negative for COVID, doesn't mean you can't spread whatever other germ you have to others, so rest and recover at home until you're all better!
