

## ***5/18/20-- Uinta County COVID-19 Update***

### **BUSINESS ASSISTANCE WITH A FEW CLICKS TO TAKE CARE OF BUSINESS AND THE HEALTH OF EVERYONE**

**--Thanks to our business owners who are navigating the new reality. There may be a little help for you**

We appreciate our local business owners for getting back to business, and changing things up to reflect their attention to health and safety.

The responsibility for watching out for the health of their staff and all others has shifted to include the places where we go to get the things we need. While businesses have been allowed to open there are some pretty strict rules they have to follow. Navigating the guidelines under the [Orders for Restaurants](#) isn't easy.

We have learned Wyoming Office of Homeland Security has new funding that will help purchase PPE for staff so they can remain compliant with the orders. Public Health would be the receipt and distributing point for those who apply. Restaurants can [apply here](#) for the no-cost PPE.

"I am confident that the public and business community will continue to recognize that their actions will allow us to continue a safe, steady path forward." (Governor Mark Gordon)
